Title: Fullstack Java Developer
Status: OPENED
From: WEB
Enterprise: CONTRACTS IT
Description: Ã€ propos de lâ€™offre dâ€™emploi

As a senior developer:
â€¢ You are able to analyse and estimate the complexity and the time needed to develop new functionalities.
â€¢ You Develop solutions to meet business requirements using new or existing technologies in collaboration with your squad, made of frontend devs, DevOps and other backend devs.
â€¢ You take part in the product design during all scrum-meetings (poker, sprint-planning, ...), you can easily adapt to complex software architecture.
â€¢ Get the most of our technological stack to increase software availability, resource efficiency, and make sure our platforms can scale & support any peak load.
â€¢ Collaborate & share your knowledge with other teams such as support, platform and project-managers to ensure the good quality and evolution of the software

Your profile :
â€¢ Graduate, Bachelor, or Master in computer science or equivalent by experience.
â€¢ 2-3 year Experience in PHP, rest services, Zend framework knowledge is a plus.
â€¢ Experience with SQL databases such as PostgreSQL
â€¢ Basic experience with SCM such as Git or SVN (we â™¥ Gitlab & Gitlab-CI)
â€¢ Experience with Docker is a plus. Kubernetes is a plus-plus-plus :)
â€¢ Experience with Javascript and Dojo Framework is a plus
â€¢ You have a good sense of humor (mandatory)
â€¢ Youâ€™re fluent in French and can sustain a basic technical conversation in English
