Description: Ã€ propos de lâ€™offre dâ€™emploi

Web Developer | Full-Time | Remote (EMEA Region)

We are a trusted recruitment partner dedicated to connecting exceptional talent with world-class organizations. On behalf of a leading international software company with a strong presence across the EMEA region, we are seeking a creative and detail-oriented Web Developer to design, develop, and maintain high-performing web applications that deliver exceptional user experiences. This is a full-time remote opportunity open to professionals across the EMEA region.

About the Role

As a Web Developer, you will be responsible for building and optimizing modern, scalable web applications that align with business goals and technical best practices. Youâ€™ll collaborate with cross-functional teams â€“ including designers, product managers, and backend developers â€“ to create seamless, responsive, and visually appealing digital experiences. This role is ideal for a developer who thrives in a fast-paced, collaborative environment and is passionate about innovation and clean code.

Key Responsibilities

Develop, test, and maintain responsive web applications using modern frameworks and technologies.

Collaborate with UI/UX designers to translate design concepts into functional and visually appealing interfaces.

Integrate front-end and back-end components to ensure performance, security, and scalability.

Troubleshoot, debug, and upgrade existing systems to improve functionality and user experience.

Write clean, well-documented, and maintainable code following industry standards.

Stay up to date with emerging technologies, tools, and best practices in web development.

Participate in agile development cycles, code reviews, and team stand-ups.

Qualifications

Bachelorâ€™s degree in Computer Science, Software Engineering, or a related field.

3â€“5 years of experience in web development or a similar role.

Proficiency in HTML, CSS, JavaScript (ES6+), and at least one modern framework (React, Angular, or Vue.js).

Experience with RESTful APIs, version control (Git), and responsive design principles.

Familiarity with Node.js, Python, or PHP for back-end integration is an advantage.

Understanding of SEO best practices, accessibility standards, and performance optimization.

Strong problem-solving skills, attention to detail, and the ability to work independently in a remote environment.

Fluency in English; additional languages are a plus.

Whatâ€™s Offered

Full-time remote role open to professionals across the EMEA region.
